EDUCATION

2024 - May 2027 (Expected) Bachelor's Degree in Computer Science at **University of Central Florida**
2021 - 2024 Associate's Degree at **Daytona State College**

WORK EXPERIENCE

Publix — Grocery Clerk

August 2021 - Present

- Managed store product by unloading shipments, stocking shelves, and blocking aisles to ensure item availability, while averaging **30 hours per week**.
- Delivered exceptional customer service by bagging and cashiering systemically and effectively while maintaining a positive attitude and approach.
- Demonstrated flexibility by cross-training across both the Customer Service and Grocery departments and working at two stores.

Planet Fitness — Member Service Representative

May 2021 - July 2021

- Guided and facilitated the new-member experience by conducting personal tours, explaining the various pieces of gym equipment, and answering customer inquiries.
- Maintained a strict cleaning rotation throughout each shift and upheld club standards to ensure a safe and welcoming environment.

PROJECTS

A Frail Qubit — Solo Developer

January 2019 - Present

- Spearheaded the complete end-to-end development of 'A Frail Qubit,' a story-based puzzle game built in the **Godot Engine** and programmed with **GDScript**.
- Designed, programmed, wrote, and tested all core project assets, including gameplay mechanics, narrative, pixel art, and **over 60 unique, handcrafted levels**.

The New Order: The Last Days of Europe — Senior Contributor

January 2020 - January 2022

- Contributed to help develop a complete overhaul game modification called 'The New Order: Last Days of Europe', serving a player base of **over 500,000**.
- Implemented complex event chains, graphical user interfaces, main event pieces, and further content designed by volunteers around the world in a remote environment.
- Authored the new contributor Git guide, reducing onboarding frustration and allowing for non-technical volunteers to push localization changes.
